

Ardoq + Lucidchart

Lucidchart Brings the Canvas – Ardoq Brings the Context

Live Diagrams From Live Data

Enterprise Architects often rely on static visuals that quickly become outdated—causing silos, misalignment, and delays.

Ardoq + Lucidchart delivers **live diagrams from live data**, directly linking visuals to your architecture truth—ensuring faster insight-to-action and stronger alignment across teams.

What You Can Do

- ✓ Generate Lucid diagrams from live Ardoq data
- ✓ Edit Lucidchart diagrams directly within Ardoq
- ✓ Auto-sync diagrams with architecture updates
- ✓ Embed visuals in Ardoq Presentations
- ✓ AI-powered import into Ardoq Scenarios

What You'll Achieve

Cut down delays with connected data and diagrams

Foster shared understanding with live visuals that drive alignment across all teams

Make visuals a central asset in planning, iteration, and transformation initiatives

Plan Future States

Model, present, and align future architectures with real-time data insights, backed with Lucid diagrams.

Context-Rich Collaboration

Edit and access Lucidchart directly within Ardoq—removing tool-switching friction and streamlining architecture workflows.

One Source of Truth

Maintain data integrity by embedding architecture visuals into Ardoq presentations, dashboards, and documentation—backed by live, authoritative data.
